

# MIC622

CONDENSER MIC 6X22 MM

- Compact and reliable Electret Microphone (Condenser MIC) for DIY electronics
- High-sensitivity condenser mic for accurate audio pickup
- Ideal mini mic for Arduino, Raspberry Pi, and microcontroller audio input
- Perfect for building Electret Microphone module based sound sensors
- Includes high-quality Electret condenser Microphone for clean signal detection
- Suitable for voice recognition, audio-triggered systems, and portable devices
- Low power consumption and small footprint for embedded designs
