

10DOF

GY-87 Module MPU6050 HM5883L BMP180 Sensor

- 3-axis Gyro+Acceleration+Magnetic Field
- Air Pressure Module
- Power supply: 3-5V
- Built in ultra low noise linear LDO voltage regulator
- Built-in onboard filters, which reduce noise from motor and other high current electronics
- You can easily select two I2C address for MPU6050 by soldered jumper
