

LOG2

I2C 2CH 3.3V-5V BI-directional Logic Level Converter

- Mutual transform between 5V TTL and 3.3V TTL
- Two channels of logic and high voltage low voltage logic can two-way transform
- Portable and lightness, with 2 rows 4 pin contact pins
- Level Converter- 2 Channel Compatible with the bread plate, can be used directly put on the breadboard
- 2 Channel Module (great for I2C or SPI) and will work with all microcontrollers, Arduino, Raspberry Pi, Intel Edison, NXP Mbed
