

B1800

Lithium Battery 18650 1800 MAH

- It is very easy to use the cell in any circuit just solder the wires on the terminals or use 18650 battery holders to easily replace the used cells.
- Care must be taken while handling Li-ion batteries as they are volatile and inflammable and should not be handled roughly and punctured.
- Also, don't overcharge and discharge beyond a certain point as gases accumulated inside might result in explosions and fire.
- Cordless Phones
- Small DRONES
- Tablet PC GPS
- iPod, DVD, MP4 Player, etc.
- Mobiles backup power supply/Power bank
