

# WC12706M

PELTIER WATER COOLING PLATE 40\*80\*12MM

- Heavy Aluminium build
- Size: 80\*40\*12mm/1.57\*1.57\*0.39inch; Can be used to patch two 40mm Peltier in same Cooler
- Nozzle is 9.5mm, can use for inner dia 7mm-8mm water cooling pipe
- Exclusive water-cooling heads, liquid-cooled water plates, and water-cooled exchangers for semiconductor refrigeration fins
- Made after double-sided polishing surface treatment, exquisite and smooth without burrs.
- Light Weight: 50 Grams
- Aluminum Water Cooling Block are meant to transfer heat from one source into the liquid that flows around the water cooling block. Removing the heat from Peltier into the liquid that runs through the water cooling block.
