

SERVOT

Servo Tester

- CCPM Servo Consistency Master / Servo tester
- The device also can be used as a signal generator for electric speed controller (ESC), then you can test your motor system without using a transmitter and receiver.
- There are 3 modes to check servos or ESC:
- Manual mode: turn the knob with different speed, check the reaction time.
- Neutral mode: make the servo go back to the neutral point.
- Automatic \"window wiper\" mode: make the servo swing like a window wipers in the biggest angle.
- It can connect 1-3 servos simultaneously and test such as 1-3 servos consistency and so on.
- You can also connect 1-3 ESC to test and compare their reaction time respectively.
- It can connect 3 servos of the CCPM helicopters and select servos.
- It can also connect the servo of airplanes install the steering-box and adjust planes by using such as the neutral mode and so on.
